BUDGETING FOR YOUR DESIGN PROJECT// RENOVATIONS

KITCHEN RENOVATION: (typical recommendation, 10-15% of the value of the house)

Determine what makes sense for you to spend by asking these questions:

(1) What can you actually afford?

(2) How long do you plan to stay in your house? If it's less than 5 years, you will want to design it in a way that you can make money on your investment when you sell. If this is your "forever home", design your kitchen with your preferences and the things you love most.

(3) Consider your neighborhood and don't over improve! Take a look at your property value and follow the rule of no less than 5% of your homes value and no more than 15% of your home's value for your kitchen renovation for the best ROI (return on investment).

BUDGETING FOR YOUR DESIGN PROJECT// FURNISHINGS

BUDGETING TO FURNISH YOUR HOME:

High End - \$60,000

Mid-Range - \$20,000

Budget - \$16,000

Living Room Furnishings:

The living room is usually the most expensive room in the house to furnish, (but if you're talking construction, the kitchen is usually the winner there). The living room is often the biggest room, and the bigger the room = more furnishings are needed.

And while everyone's personal style varies, the living room is where homeowners most often want to put their best foot forward- it's the place they entertain friends and family, and the place they relax in the evenings and weekends. This is the room where they're more willing to spend money on quality, whatever the style.

Mid-Range	\$25,000

High End - \$39,000

Mid Range - \$25,000

Owners Suite Bedroom Furnishings:

Tell me which of the following sentiments most accurately describes how you feel about your owners suite bedroom:

1. "Why should I spend money on a room I'm only in just before or after bed? During the day, I'll just close the door so I don't see it."
2. "Life is so crazy. I'm on the go from the time the alarm goes off until the time the kitchen is clean. The kids have their stuff everywhere. I need my bedroom to feel like an oasis!"

Raising my daughter + son, handling their schedules, managing the house and my business, I am TOTALLY in the latter camp. In fact, the owners suite bedroom was one of the first rooms I decorated in our home, so that it could be our escape from the chaos and clutter that we're fighting against elsewhere.

The investment piece in this room is the bed, of course. While cheap options abound all over the internet, go for hardwood frames and quality construction to avoid squeaks, sags, and wobbling ... and the inevitable landfill a few years later. A quality bed can last decades.
